Nov 01, 2020

# CONTENTS

<b>1</b>	<b>User's Guide</b>	<b>3</b>
1.1	Installation . . . . .	3
1.2	Quickstart . . . . .	4
1.3	License . . . . .	4

Welcome to the Official documentation of Aston Unofficial (ironic I know). Get started with the Installation and Quickstart guides.

This project depends on:

- [Flask](#)
- [Bootstrap](#)

you can find the documentation using the above links.

## USER'S GUIDE

### 1.1 Installation

#### 1.1.1 Python Version

We recommend using the latest version of Python3. This project was created using Python3.8

#### 1.1.2 Python Dependencies

These dependencies will be installed automatically when using Docker.

```
$ pip3 install -r requirements.txt
```

- Flask
- ItsDangerous
- FlaskMail
- Gunicorn
- FlaskWTF
- Discord

#### 1.1.3 Docker

To run this project, you must have Docker and Docker-compose installed. These services handle running the Database, Flask, and Discord bot. Although it is possible to run snippets of this project individually, you will not be able to use the entire project without the use of docker-compose.

You may follow the [docker installation guide](#) for more information about this topic.

Once all of these dependencies have been installed, you may follow the Quickstart guide for information about building and developing the project.

## 1.2 Quickstart
